DGT Misting Nozzles

- The DGT misting and watering nozzles are the finest low pressure nozzles available
- They are made with strict quality control measures to assure each nozzle performs per specifications
- These PVC misting nozzles are partly self-cleaning, as the needle vibrates slightly during operation, and the nozzles are supplied with a built-in filter
- It is suggested the white and blue misting nozzles be alternated on the misting line for better coverage. The heights of their water/mist patterns are different to help prevent the misting patterns from striking each other on the same plane.
- Nozzles have either a 3/8" BSW thread or an 1/8" barb and can be inserted using nozzle adapters

Please call our irrigation department for questions and ordering
