

Shade Structures

Sunstopper

The sun can be brutal on tender young plants. The Sunstopper will protect your plants from scorching and windburn while reducing water requirements and time. It is equally at home in a retail environment as it is in a commercial growing operation.

The Sunstopper is a low-cost, multipurpose structure that is easy to assemble and available with several options of shade cloth. Sturdy anchor plates or ground stakes secure it against high winds. Modular design allows for future expansion.

Specifications

Width/Lengths: 10' x 20' or 20' x 20' blocks (custom sizes available)

Anchors: ground stakes or optional base plates with concrete anchor bolts

Vertical Posts: 2-1/2" outside diameter 12 gauge x 10' galvanized steel

Cover: 30-90% shade cloth

Standard shade structure includes: 60% black knitted shade fabric with taped edges, grommets 18" on center and 10" canopy ball bungees

W-Truss

The W-Truss not only provides you with the required benefits of a shade structure—customer comfort, reduced watering and product protection—but it does so with an elegance and style your customers will notice.

It's one of the strongest shade structures in the industry! Utilizing heavy-duty, 3" square, 12 gauge galvanized posts, the W-Truss is definitely built to last, and we can configure this structure to meet your individual layout needs.

Peaked roof options also available in 3 pitch choices (3/12, 5/12, 7/12) Call for more information.
