

# MNBF Powder Coated Steel Exhaust Fans

A complete ventilation package that combines the MNBF powder coated steel fan with all aluminum shutter (type LRW), a heavy gauge galvanized steel wall housing (square box or slope) and PVC coated wire inlet and outlet guards.

- The exhaust fan panel is fabricated from heavy gauge steel and features an all-welded construction. The uprights which support the motor and propeller are formed from heavy gauge steel for maximum strength and rigidity
- Parts are powder coated with a thermosetting epoxy coating to provide a protective coating rated excellent for hardness, impact resistance, adhesion and chemical resistance
- The MNBF series of fans utilize the same drive assembly as the MAL series

## Powder Coated Steel - MNBF series

MNBF series exhaust fans are powder coated steel fans assembled in slope wall housing with motor mounted. Assemblies are complete with fan, motor, LRW shutter, slope wall housing and one wall housing guard
